

PRESS RELEASE

It has been about 2 years by now – on January 1st 2017 - that the Herfurth Group took over the company M-Star Freight Agencies BV located in Rotterdam (The Netherlands).

Those 2 years gave our different project logistics departments the time to know and meet each other in order to optimize and integrate the competences and know-how of the two companies Herfurth Logistics and M-Star Freight Agencies and to give birth to a new organization called **M-STAR Projects**.

M-Star Projects combines 40 years of experience in Projects Logistics with the Herfurth Logistics 120 years of competences, worldwide networks and a proven reputation of reliability. This experience enables M-Star Projects to deliver tailor-made solutions in the logistics execution of large scale industrial projects for companies, active among other things in Chemical and Petrochemical, Energy, Engineering, Procurement and Construction (EPC), Mining, Oil and Gas, Power plants, Shipbuilding and Sustainable Solutions

M-Star Projects has a dedicated team of very well skilled people located in the Netherlands, Belgium, France & Turkey. Whilst the legal entities in each country remain unchanged, this new brand will accentuate HERFURTH LOGISTICS' knowledge and dedication to service the industry in terms of non-containerized logistics, both locally and globally.

The official launch of this new concept and branding will be celebrated during the Antwerp XL fair on 7-9 May 2019 in Antwerp

We're getting things done, designed to your expectations.
